

School of Destiny Nursery School  
Brikama Kabafita Layout  
West Coast Region  
The Gambia.  
31<sup>st</sup> August, 2017

**TO WHOM IT MAY CONCERN**

**REQUEST FOR SUPPORT**

It is indeed a great pleasure to write you this request letter for support on behalf of the management, parents and children of Destiny Nursery School.

The community came together to build School of Destiny Nursery school in year 2014 for their children, since then the school is in operation, with the little school fees paid by parents for the children and the supports from Miss. Marieke vanderWal with toys, tables, books and she also constructed school toilets, however the school is facing numerous challenges such as:

1. Lack of school fence, which is a major concern for the management and parents of the school. The school is very unsafe for children most and the materials of the school.
2. Lack of sponsorship for the tuition fees of the three (3) unqualified teachers at the school, the teachers are going through training at the Gambia College but challenge to complete their studies due to lack of funds.
3. The school need more support with table and chairs to fill the empty class room at the school, which is not in use due to lack of enough tables and chairs.

In conclusion:

The support for building of school fence will help in the control and security for children, staff and secure the materials of the school.

With support to pay for the tuition fee for these teachers will go a long way in promoting quality learning and teaching at the school?

The support for the chairs and table will improved enrollment of more children at the school, thereby, provide access to education for more children at the school..

While we anticipate for your valuable support, we hope our request will be favorably considered.

Yours Sincerely,

Jerreh Manneh

The Coordinator.

Mama Africa Support Gambia.
